NOTE FOR:

D/M&P/DS&T

FROM: General Counsel

SUBJECT: Transition Team Topics

1. With apologies for the delay, I offer the following suggested topics for consideration by the group planning transition briefings. These are in addition to the usual overview of OGC and the particular laws that our practice covers.

- An expanded E.O. 12333 briefing, providing both the legal and policy authorities and restrictions as well as some history behind their enactment;
- An overview on controlling classified information, including compartmentation, pre-publication review and the PRB, leaks, the use of the polygraph, and our policies on providing access (especially source identifying information) both in the Executive Branch and the Hill;
- The procedures used to consider and approve covert action programs and the successes and pitfalls of particular types of covert action programs;
- The relationships of the CIA and the DOJ, including CIA assistance to law enforcement, the role of the CIA in criminal proceedings, and the use of intelligence in law enforcement especially in counternarcotics and counterterrorism areas; and
- The process by which intelligence is prepared and disseminated--i.e., the difference between the NID, a type script, an estimate, etc.

2. In addition, I am attaching a 1980 memorandum that appears to have come from an exercise very similar to the one in which we are engaged.

FROM: [Redacted]
Associate Deputy Director for Intelligence

SUBJECT: Issue Topics for Transition Team/New Administration

1. Congressional oversight.

2. CIA's interface with the policy process (how we are represented at NSC, PRG, PCG levels, etc. Important to insure that we are at least as well plugged in to a new administrative process).
